

Calf Barns

Protect your calves from the elements

Manufacturing, LLC

CK Calf Barns

CONSTRUCTED WITH:

- Hot dipped galvanized steel structure. No wood is used in the structure.
- Versatile design. Each bay is 12' long x 8' deep and can be used for three 4' x 8' calf pens, or a 12' x 8' large pen.
- Designed for simple cleaning.
- Easily expandable for future growth.
- 5' overhang provides additional protection.
- Durable ag curtain walls.

About our curtains

CK understands the role good ventilation and air circulation play in the health of your calves. Our curtains are manufactured using durable curtain material and galvanized hardware.

**Three gates
within a gate**

Standard three pen bay

Open entire bay for cleaning with main gate, or access a single pen using the small built-in gates. Each pen has easily removable vinyl divider panels.

Features & Options

Any bay can easily be converted for group feeding with optional 12' slant bar gate, shown with galvanized feed trough.

Optional feed room with double wide access door. Overhead door in the rear.

Head lock latch

Each pen has two openings to prevent feed and water cross contamination. One opening includes a headlock.

Unique spring design allows it to close consistently and securely every time.

Optional wall hanging hay feeder.
