About Us

CK Manufacturing is one of the top companies serving all needs of dairy farmers since 1998. We are excited to be offering complete interior renovations for dairy barns across the East Coast. The most important commitment that we have is to our customer. You can be certain that when you see the CK name, you are receiving the highest quality construction, as well as a job that will exceed your expectations. One of the services that we offer is dairy barn installation, along with the renovation of stalls and curb build up.

Dairy Barn Curb Build Up

A cattle stall replacement requires several elements. Sometimes, the curb can simply be built up if it is too low. Allow the professionals at CK Manufacturing to assess your needs and find out if this is an option. In order to simply do dairy barn curb build up, our construction experts will pour concrete onto the existing curb in an effort to build it up. Knowing that dairy cows must be milked at least twice a day, we will strive to do the work without interfering with the normal milking routine of your cows. The job will be done quickly and efficiently, ensuring that your cows will be back in their regular stalls as soon as possible.

CK Manufacturing prides itself on being customer service oriented, producing high quality products that will exceed all expectations. Each product is unique and individualized to your specific needs.

Knowing how important it is for your cows to remain in their own environment, we make every effort to make sure that they are milked in their own stalls. The only time cows would be removed would be during a complete renovation; at that point, time and customer satisfaction would still be the primary concerns.

CK Manufacturing offers top quality cattle control equipment and renovations. These services are available through our company and are also available to contractors. We provide a wide variety of services including standard replacement stalls (require no concrete work), gravity flow gutters, free stall barn renovations, and stainless steel trough liners. No matter how big or how small your project is, call CK Manufacturing today and ask about our options.

We offer expert concrete services for all of your new barn or renovation needs

I-BEAMS

Gravity Flow Gutters

- No more manure jam ups
- Better manure flow
- New gutters without missing a milking

Our precast style gravity flow gutters are wider at the bottom than at the top which creates a natural force that produces better manure flow.

Gravitational Force

Agri-Trac Traction Milling

- Increase Milk Production
- Increase Heat Detection
- Reduce Hoof & Leg Injuries
- Reduce Cull Rates

The choice of Cornell University

"AGRI-TRAC'S Traction Milling fixed our grooved floors here at Cornell University's Dairy Barns! Our cows do not slip anymore, they walk with comfort and confidence. AGRI-TRACS Traction Milling was even complimented by many of our Veterinarians, Nutritionists and outside vendors! It is well worth the cost! We will choose AGRI-TRAC again in the future! It really works and it lasts!"

Cornell Dairy Management Team

"20 years ago in 1999 AGRI-TRAC milled our slats, holding area and parlor. Those barn floors traction are as good today in 2019 as the day they were done in 1999."

Folds for easy transport & storage

Part# GCA3684

- All aluminum construction
- Portable
- Includes matted floor for traction
- Constructed with 2" tubing
- Four position side rails — horizontal or vertical
- Adjustable headlock
- Total weight 131 lbs.
- 3' wide x 7' long

Folds to 2'10" x 7'8" x 9" high

Yes! *We really have Solid Square Stock Anchor Systems.*

CK believes the base is the foundation to a great stall system. So you will not find hollow tubing anchoring our stalls. Instead, we use solid square stock. Heavy-duty construction continues throughout our stall with features such as a second divider pipe so your cow stays where it belongs.
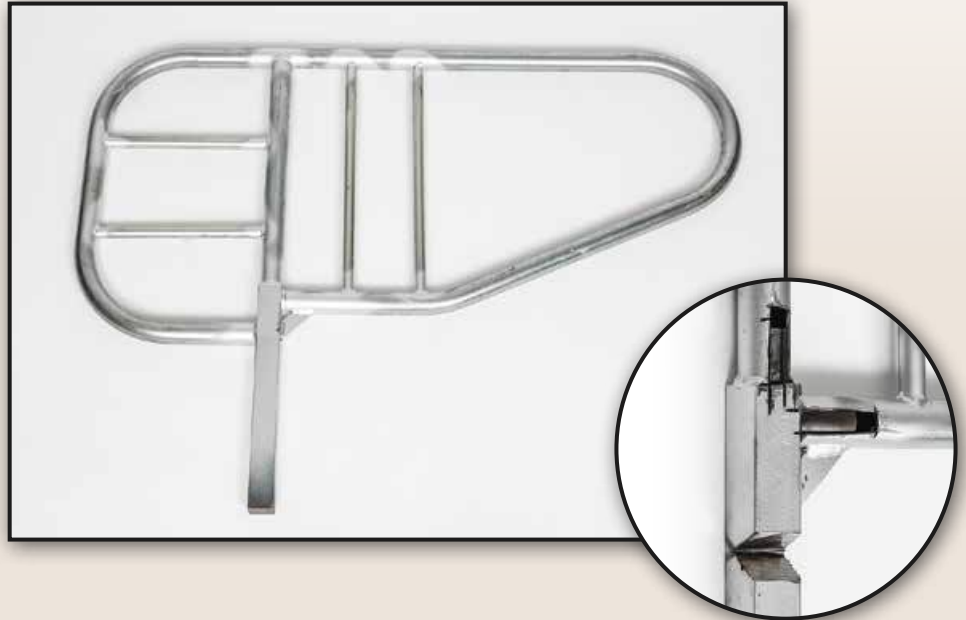

Replacement Stalls

New Curb

Flexible Stalls

Replacement Stalls

Making renovations easy, replace your worn out stalls while saving your existing curb!

- **Save time:** Our stalls are finished in as little as 1 day.
- **Save money:** Because our replacement stalls will fit your existing curb, there are no masons or concrete to pay for.
- **Long term increased production:** The position of our water bowls means your cows drink more water: More Water = More Milk.
- **No loss in production:** Your cows will be back in their stalls the same day. Our crews start after your morning milking & finish before your evening milking.
- **Optional:** Stainless steel tie rail

40 New Stalls in Less Than 8 hours!

Our crews will begin by cutting off the old stalls and stripping the old curb clean. Next, the new stall components are slid into the existing pipe in the curb. The new stall is then welded to our heavy-duty anchor plate and anchored with 2 stainless steel anchor bolts.

Tight Corners?

Corner savers are standard on all end loops.

- Manufactured with 1.90 ten gauge Gatorshield Tubing.
- Two vertical pipes to eliminate grain stealing.
- 2" of solid square stock is machined to fit into upright pipe for extra strength.
- End loops feature our unique corner saver, which allows 4" more clearance for feed carts, etc.
- Special sizes available for Jerseys.

Flexible Tie Stalls
The safest, most comfortable tie stall available

Our Flexible Tie Stalls with rubber are rigid enough to maintain structural support, yet flexible enough to reduce injuries.

Tie Stalls

Our flexible tie stall blends the characteristics of our traditional tie stall with the benefits of plastics.

Benefits

- Provides a sturdy, flexible framework to allow freedom of movement while minimizing injuries to cows and people
- Increases cow comfort
- Does not oxidize
- Available as *Replacement Stall or New Curbs.*

Flexible Free Stalls
The safest, most comfortable stall available

The EasyFix Flexible Stall with rubber loop provides a flexible framework as compared to rigid metal loops, helping to reduce cow injuries.

Free Stalls

Benefits. The EasyFix Flexible Stall encourages cows to lie correctly and for longer periods of time.

- The flexible stall divider system, new rubber neck rail bracket, and rubber loop provide freedom of movement, helping to reduce injuries and healthcare costs.
- Increased lying times and improved cow comfort, lead to higher milk production.
- Lower replacement rates than traditional steel.

Features. The EasyFix Flexible Stall has been designed using flexible plastic tubes, a new rubber neck rail bracket, and a rubber loop.

- The new design provides freedom of movement into and out of the stalls.
- Easy to install and adjust.

Free Stalls

CK Free Stalls allow for greater comfort when entering and exiting stalls, as well as more lunge space for head and neck between top and bottom of loop.

Free Stall Features

- The most versatile free stall designs
- Greater cow comfort when entering and exiting
- 2⅜" OD high yield steel tubing w/ a 10 gauge wall
- Calf, heifer, and cow stalls

Milker Cart & Accessories

Milker Carts

We have increased the durability of our Milker Carts – and at the same time significantly reduced the price. We improved the design to one universal cart that can handle the bulk of dairy needs. The MC-55 holds up to 10 milking units, and is easily maneuvered with 2 heavy-duty front swivel wheels that no longer have bearings to rust out. The large pneumatic rear tires move smoothly over irregular barn floors.

- Expanded metal tray on the bottom for easy cleaning – 55"L x 14"W x 6"H
- Conveniently located front pull handle
- Lower profile moves easily under pipes
- Wide track design provides stability

- Durable plastic utility tray with drawer for vet supplies
- Conveniently packaged to ship UPS or FedEx
- 55"L x 24½"W x 64"H
- Available with either a paper towel holder or bucket holder

CK Manufacturing fences are made of heavy-duty tubing
to last years longer than uncoated tubing.
Don't throw money away with cheap fencing!

We *make gate panels and corral panels too!*

We make panels to fulfill a variety of needs.
Fence panels, gate panels, and
corral panels are our most popular;
however, we provide sloped panels as well.

Gates

CK Manufacturing offers a large selection of gates.
Cow walk, counter balance, finger, and guillotine gates are
only some of the specialty gates we manufacture.

Adjustable hinges are standard

All gates and fencing are made of 1.9"
outside diameter steel tubing with 13
gauge high yield steel tube.

- 15% heavier than 14 gauge.
- 45% heavier than 16 gauge.
- 85% heavier than 18 gauge.
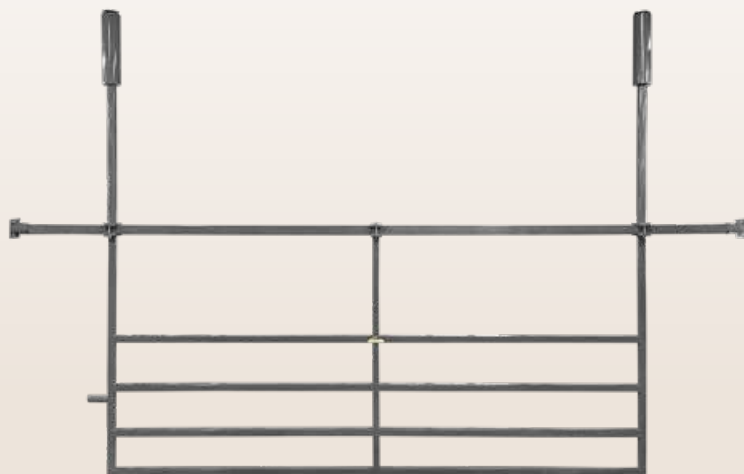

Gates and fencing can be custom-built to your specifications. Standard heights are 38" high (4 bars), 48" high (5 bars), and 54" high (6 bars).

Counter Balance Gate

Double Hinged Gate

The gate that opens from either end!

Double hinged gates are made of 1.9" outside diameter steel tubing with 13-gauge high yield steel tube.

- One hand opening
- Slam closing with positive latch
- Powder-coated or galvanized
- Custom sizes available
- Multiple mounting options available

Scissor Gate

This convenient gate swings up and out of the way.

Excellent choice for tight areas in free stall barns, and as a safety gate at loading docks.

Description

- Made of 1.9 O.D. 13 gauge high yield steel tubing
- 3 standard heights

Options

- Our standard lengths are from 3 feet to 20 feet
- We manufacture to opening size
- Galvanized or powder-coated

Gates

G38 Series
38" High Gates

G48 Series
48" High Gates

G54 Series
54" High Gates
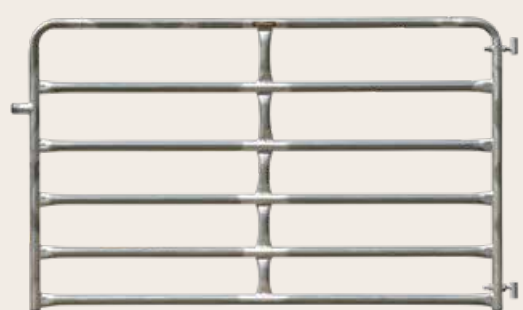

Description

- Gate perimeter is made from 1.9 O.D. 13 gauge wall high yield steel tubing
- Slant bars are 1" schedule 40 pipe
- 2 standard heights
- Two stubs are used to secure slant bar gates

Options

- Our standard lengths are from 5 feet to 20 feet
- We manufacture to opening size
- Galvanized or powder-coated
- Varying configurations including:
    - calf, heifer, or cow slant spacing
    - full slant or ¾ slant with feed trough rail

G38S Series
38" High Slant Bar Gates
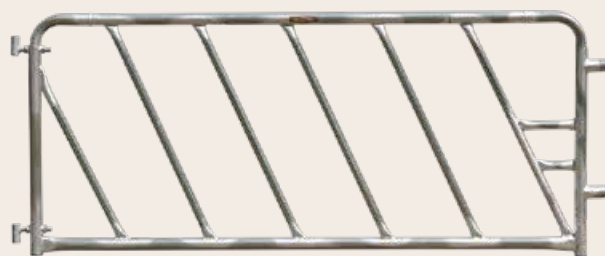

G48S Series
48" High Slant Bar Gates

Gates
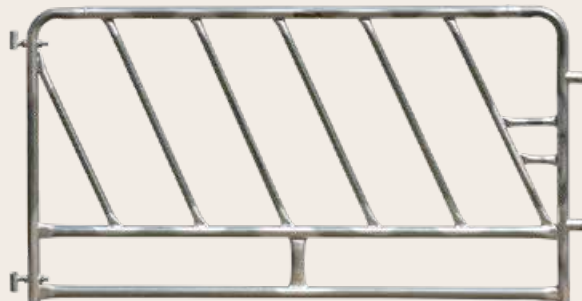

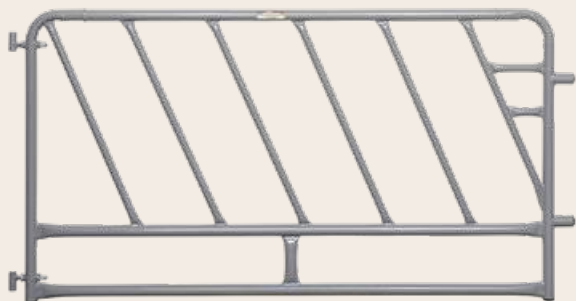

Description

- Made of 1.9 O.D. 13 gauge high yield steel tubing
- 3 standard heights
- Retracts approx. 5" less than its standard length
- Extends approx. 1⅓ standard length

Options

- Our standard lengths are from 6 feet to 20 feet
- We manufacture to opening size
- Galvanized or powder-coated

Manure Push Off Guards

Recommended by pit installers, the CK push off guard protects against needless accidents. Whether it's curious cattle, careless adults, or unsupervised children, your mind can be at rest.

- Available in 8', 10' and 12' lengths, the gate is controlled with a single spring-loaded lever, centrally located 54" off the ground.
- Positive locking with 1" bolts on both sides protects humans, animals and equipment from life-threatening mishaps.
- Steel rods cast into the concrete allow manure to fall easily into the pit, but keep everything else safely where it belongs.
- With 30" of sheet metal at the bottom and another 24" of expanded metal on top, the guard is more difficult for children to climb than the fence around it.

Both models are available in three sizes.

Sizes	Posts Set Center to Center	Posts Set Overall Width
8'	94"	98"
10'	118"	122"
12'	142"	146"

Gravity Flow Gutters

- No more manure jam ups
- Better manure flow
- New gutters without missing a milking

Gravitational Force

Our precast style gravity flow gutters are wider at the bottom than at the top which creates a natural force that produces better manure flow.

Calf Barns

Protect your calves from the elements

CK *Calf Barns*

Manufacturing, LLC

CONSTRUCTED WITH:

- Hot dipped galvanized steel structure. No wood is used in the structure.
- Versatile design. Each bay is 12' long x 8' deep and can be used for three 4' x 8' calf pens, or a 12' x 8' large pen.
- Designed for simple cleaning.
- Easily expandable for future growth.
- 5' overhang provides additional protection.
- Durable ag curtain walls.

Rear view shown with feed room

About our curtains

CK understands the role good ventilation and air circulation play in the health of your calves. Our curtains are manufactured using durable curtain material and galvanized hardware.

Three gates within a gate

Standard three pen bay

Open entire bay for cleaning with main gate, or access a single pen using the small built-in gates. Each pen has easily removable vinyl divider panels.

Features **&** Options

Any bay can easily be converted for group feeding with optional 12' slant bar gate, shown with galvanized feed trough.

Optional feed room with double wide access door. Overhead door in the rear.

Head lock latch

Each pen has two openings to prevent feed and water cross contamination. One opening includes a headlock.

G A T E GRABBER

Unique spring design allows it to close consistently and securely every time.

Optional wall hanging hay feeder.
